Anhui Huayide Intelligent Equipment Co.,Ltd

## Lightweight / Intelligent / Convenient

Operation with chain bucket elevator  
Combining RFID radio frequency technology  
Use multi-layer rotary

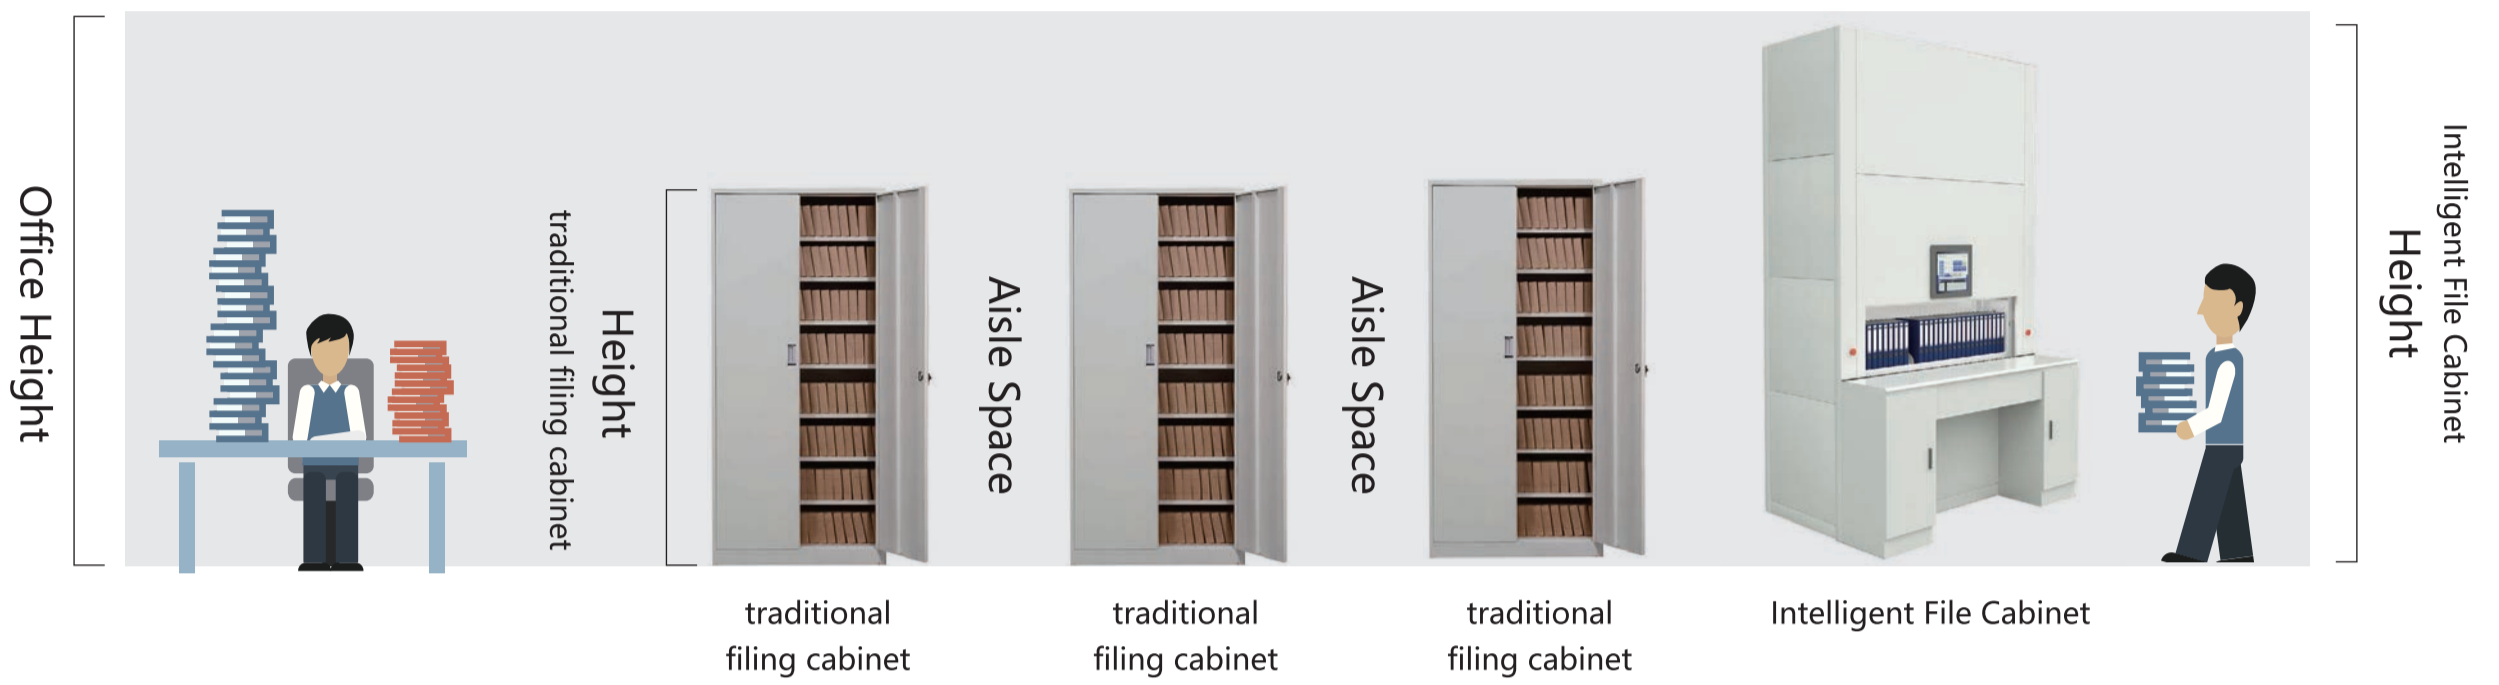

shelves greatly increases the effective storage capacity  
automatic control with computer to accomplish automatic shortcut  
selection

# Product advantage

- Increase storage capacity

Waste of space and inconvenient access

Traditional File Cabinets

Compared with traditional file cabinets, the effective warehouse capacity is greatly increased

Different types of automatic layer selection filing cabinets can be selected according to the actual use height of the warehouse, making full use of the warehouse space, saving a lot of warehouse floor space (can save 40% to 60% of the warehouse area), and reducing the scale of infrastructure investment.

Save warehouse space

40% ~ 60%

## Product advantage

- Fast and accurate access

“  
**Accuracy 99%**

Find file accurately through check cabinet any time

- Dedicated management platform for automatic control, precise inventory and information control, and automatic shortcut selection
- The WES (Material Execution System) control system independently developed by the vertical rotary container is intuitive and convenient to operate, and the operation is stable and reliable. Realize management, access automation. Both automatic operation and manual operation are possible.

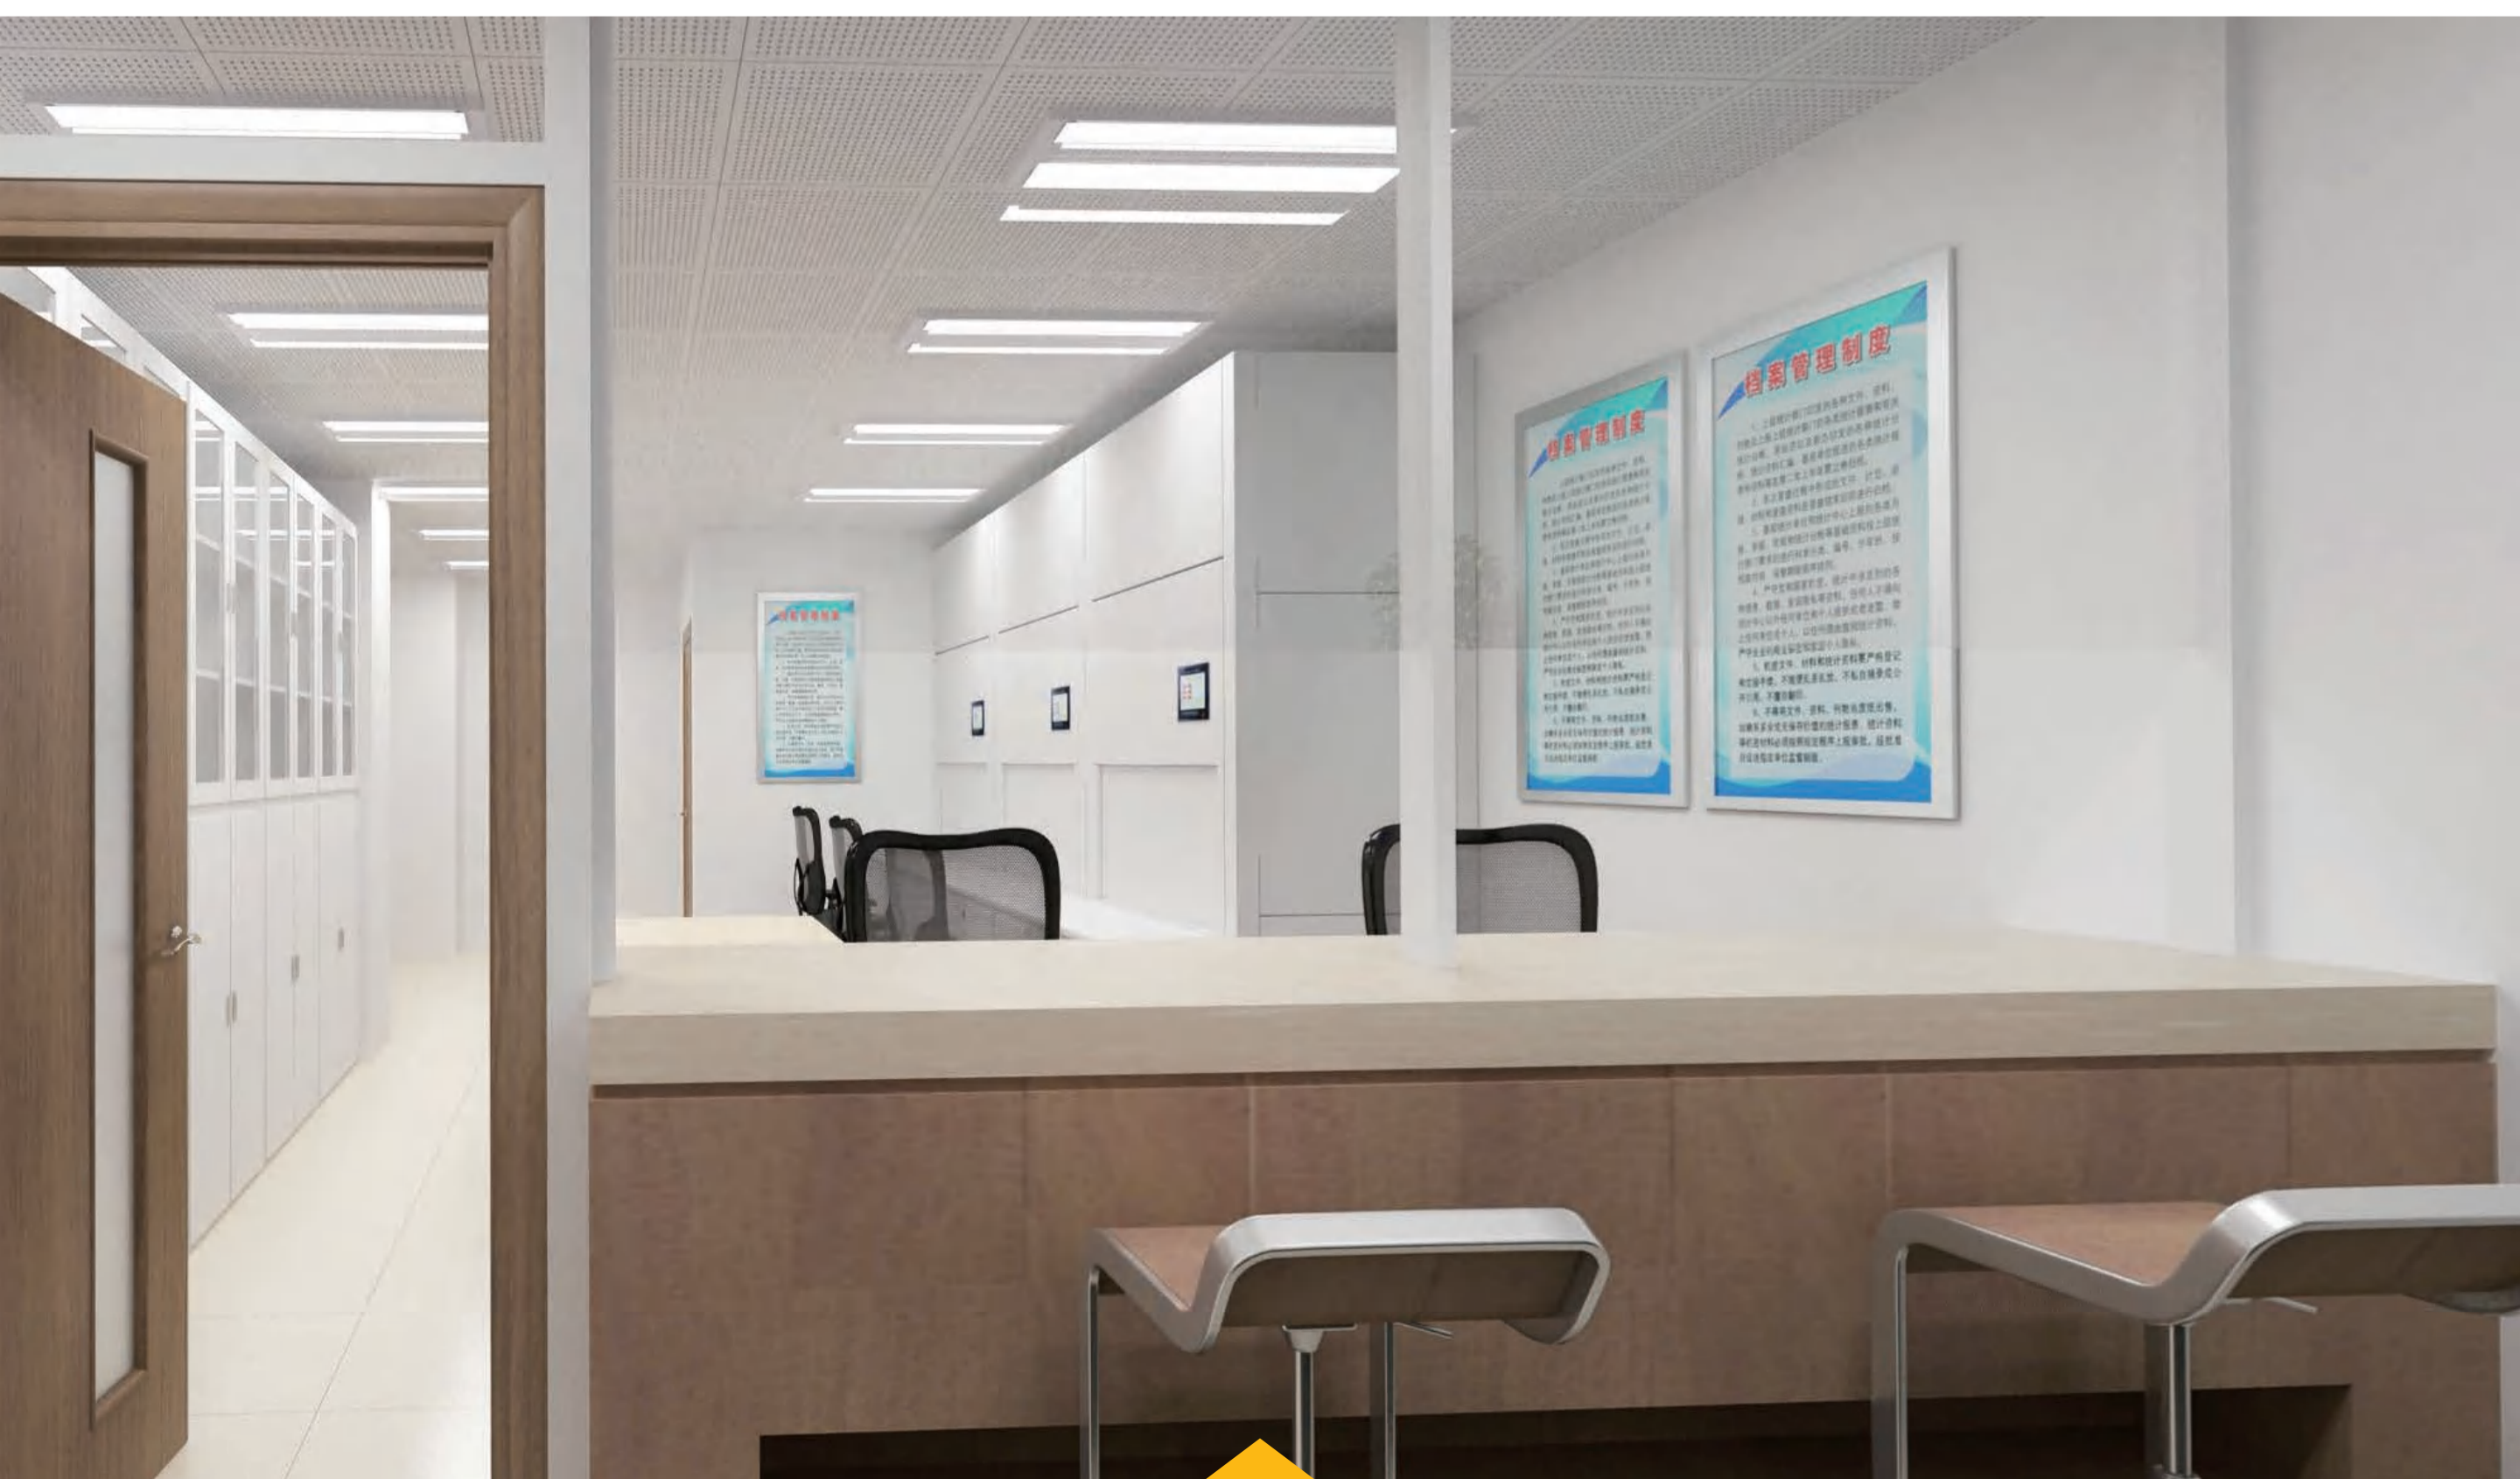

# Product Advantage

## ○ Secure access

- Using high-quality steel plate fully enclosed shell design, so that the stored items can achieve anti-theft, dust-proof, anti-theft requirements for fire and glare protection
- Equipped with photoelectric protection device to ensure the safe operation of staff.

# Product advantage

- Handling documents in an ergonomic way

# Scene comparison

Large area × Low efficiency ×  
Too much labor × Inconvenient to access ×

Optimize
